SOLUTIONS ACROSS INDUSTRIES TAILORED INNOVATION FOR EVERY CHALLENGE

At Macksons Power & Energy, we are proud to partner with some of the world's leading brands—Graco, Nilfisk, Viper, and UMEK—to bring high-quality, innovative solutions to the Sri Lankan market. These partnerships enable us to provide cutting-edge products in industrial cleaning, painting, and water treatment, ensuring superior performance and durability for local industries. Our commitment to quality and sustainability aligns with these global brands, allowing us to deliver world-class solutions tailored to the unique needs of our customers in Sri Lanka

GRACO Nilfisk UMEK 3M Authorized Distributor

DIVERSE SOLUTIONS FOR A CHANGING WORLD

Industrial Cleaning Systems:

Advanced vacuum cleaners, scrubbers, and sweepers designed for industrial and commercial applications.

Airless Paint Sprayers:

Precision-engineered airless sprayers for professional-grade painting in industrial, commercial, and residential projects.

Water Treatment Solutions:

Cutting-edge water purification systems for industrial, commercial, and residential use.

Industrial Cleaning

Water Treatment

Pressure Washing

TAILORED INNOVATION FOR EVERY INDUSTRY

Construction:

Airless paint sprayers for high-efficiency, professional finishes.

Healthcare & Hospitality:

Advanced cleaning systems to maintain hygiene and safety.

Manufacturing & Commercial Spaces:

Water treatment systems for efficient and clean water usage.

GRACO

GRACO AIRLESS SPRAYERS PRECISION MEETS PERFORMANCE

Trusted by professionals for over 40 years, Graco airless sprayers deliver speed, precision, and a flawless finish. As the global leader in airless spraying technology, Graco has set the standard for precision and performance in the painting industry. By partnering with Graco, we offer Sri Lanka access to the most advanced airless sprayers that ensure faster application, superior finishes, and increased efficiency. This collaboration allows local contractors and businesses to achieve professional results while saving time and costs.

WHAT IS AIRLESS SPRAYING?

Airless Spraying is a high-efficiency painting technique where paint is pumped under high pressure through a spray gun, atomizing the paint without the need for compressed air. This method provides:

Less Overspray:

Minimal paint “bounce back,” ensuring more precise application.

Thicker Coats:

A single pass delivers a smooth, even coat.

High Efficiency:

With 60%-90% transfer efficiency, it minimizes waste and increases coverage.

Versatility:

Easily atomizes thick materials without solvents.

WHY CHOOSE AIRLESS SPRAYING?

Faster:

Paints 9,000 sq. ft. in just 5 hours—4 times faster than a roller, 6 times faster than a brush.

Better Finish:

Uniform and professional results on any surface.

Earn More:

Saves 50%-70% in application time, with 50% labor savings, boosting profit margins by up to 25%.

Competitive Edge:

Impress clients with cutting-edge technology, ensuring timely project completion.

PETROL OPERATED AIRLESS PAINT SPRAYERS

- GMAX 3900 Hi-Boy Standard
- GMAX 7900 ProContractor
- TexSpray 5900/7900 HD - Standard

Nilfisk

CLEANER SPACES, SMARTER SOLUTIONS: NILFISK FOR PROFESSIONAL CLEANING

Nilfisk is synonymous with reliability and performance in the professional cleaning sector. By partnering with Nilfisk, Macksons Power & Energy brings top-of-the-line cleaning equipment to Sri Lanka, from industrial vacuums to floor scrubbers. These products are designed to deliver powerful cleaning performance with minimal environmental impact, making them ideal for industries ranging from hospitality to healthcare.

NILFISK PROFESSIONAL CLEANING EQUIPMENT

Clean Beyond Expectations:
Nilfisk Cleaning Equipment for Professional Results

Nilfisk is synonymous with innovation and performance in the professional cleaning world. From powerful vacuums to floor scrubbers, Nilfisk offers reliable and efficient cleaning solutions for hotels, offices, hospitals, and more. With eco-friendly designs and easy-to-use features, Nilfisk equipment ensures top-notch cleaning while reducing environmental impact.

VIPER WET & DRY VACUUMS

Power and Flexibility:
Viper Wet & Dry Vacuums for Any Job

The Viper range of wet and dry vacuums combines power, ease of use, and versatility. Ideal for commercial and industrial spaces, these vacuums handle everything from dust to liquids with minimal effort. With robust suction and user-friendly designs, Viper vacuums are perfect for a variety of cleaning tasks, ensuring spotless results every time.

MPE’s multipurpose valves offer reliable, flexible water control across a range of applications. Whether manual or automatic, our valves are designed for long-term durability and ease of use, ensuring optimal water flow and pressure management. Perfect for both residential and industrial water systems, MPE valves guarantee performance and longevity.

SCRUBTEC FLOOR SCRUBBER DRYERS

Effortless Floor Cleaning:
Scrubtec Scrubber Dryers for Maximum Efficiency

Scrubtec’s compact floor scrubber dryers deliver powerful cleaning performance in a user-friendly design. With easy-to-use features like foot-operated squeegees and high-capacity water tanks, these machines make floor maintenance quick, efficient, and cost-effective. Perfect for commercial spaces, Scrubtec provides the solution to maintain pristine floors.

DENSIN HIGH-PRESSURE WASHERS

Tackle Any Challenge:
Densin High-Pressure Washers for Industrial Strength

Densin high-pressure washers are engineered to meet the most demanding cleaning needs. From routine tasks to high-intensity jobs, Densin washers provide versatile, high-performance cleaning with innovative features. These cold water units offer premium performance and durability, ensuring you have the power to clean effectively every time.

ES 300 CARPET EXTRACTORS

Deep Clean, Fast Dry:
ES 300 Carpet Extractors for Extended Carpet Life

Experience a new era of carpet cleaning with the Nilfisk ES 300 Carpet Extractors. Designed to remove dirt and extend the life of your carpets, these extractors are easy to operate and deliver powerful cleaning performance. With adjustable handles and high suction power, the ES 300 ensures deep cleaning and fast drying, making it ideal for both light and high-traffic areas.

SW 750 ROAD SWEEPERS

Silent Efficiency:
SW 750 Road Sweepers for Indoors and Out

From retail areas to gas stations, Nilfisk's SW 750 Road Sweepers are versatile, battery-powered machines that get the job done—quietly. With a productivity rate of 2,880 m^2 per hour and a run time of up to 3.5 hours, the SW 750 provides a quick and thorough clean, even in noise-sensitive areas. Compact, efficient, and easy to use, this sweeper is a must-have for maintaining cleanliness indoors and out.

WATER TREATMENT SOLUTIONS

Clean Water, Pure Innovation:
MPE Water Treatment Solutions

From reverse osmosis systems to UV water sterilizers, MPE's water treatment solutions ensure clean, safe water for residential and industrial applications. Combining advanced filtration technologies with robust designs, our solutions are tailored to meet the diverse needs of water purification and treatment. We are committed to providing cost-effective, eco-friendly water solutions for every setting."

MULTIPURPOSE VALVES

Precision Control:
Multipurpose Valves for Water Management"

ENSURING IMMACULATE SPACES IN SRI LANKA'S LEADING HOTELS AND WORKPLACES

From luxury hotels to bustling office spaces, Nilfisk cleaning solutions are the trusted choice for maintaining pristine environments. UMEK WATER TREATMENT SOLUTIONS FOR A CLEANER TOMORROW

Viper delivers robust, user-friendly cleaning solutions designed for both wet and dry applications. Known for their versatility, Viper’s vacuums and floor cleaning machines combine powerful suction with intuitive operation, making them ideal for industries ranging from hospitality to construction. With a commitment to reliability and performance, Viper ensures every cleaning task is done efficiently and effectively.

RO MEMBRANE SOLUTIONS

Purify with Precision: RO Membranes for Every Application

UMEK’s Reverse Osmosis (RO) and Nanofiltration (NF) membranes offer customized water treatment solutions for industrial, commercial, and residential needs. From brackish water and ultra-low pressure membranes to seawater desalination models, our RO membranes ensure pure, safe water for any application.

RO DRINKING WATER SYSTEM

Pure Water, Every Drop: RO Systems for Home and Business

Our Reverse Osmosis drinking water systems provide clean, safe water for drinking and cooking. With multi-stage filtration, including sediment, carbon, and RO membranes, these systems effectively remove contaminants, ensuring fresh, purified water for everyday use.

UV WATER STERILIZER

Eliminate Impurities: UV Sterilizers for Instant Disinfection

UMEK’s UV water sterilizers offer a fast, chemical-free solution to disinfection. By using ultraviolet light, they effectively kill up to 99% of biological impurities in seconds, ensuring clean, safe water without altering taste or pH. Ideal foar homes and industries looking for efficient water treatment.

FILTER CARTRIDGE HOUSING

Durable Protection: Filter Cartridge Housings for Reliable Water Filtration

UMEK’s slim, high-capacity filter housings provide reliable water filtration for homes and commercial properties. Designed for high pressure and long-term use, these housings protect against impurities, ensuring consistent water quality while being easy to maintain.

FRP VESSELS

Strength and Stability: FRP Vessels for High-Performance Filtration

Our fiberglass-reinforced plastic (FRP) vessels are built for high-pressure, high-efficiency water treatment. With a seamless polyethylene inner liner and a strong epoxy resin outer shell, these vessels are ideal for industrial and commercial applications requiring durable, long-lasting filtration solutions.

AUTO SOFTENER MULTIPORT VALVE

Seamless Water Softening: Auto Multiport Valves for Enhanced Control

UMEK’s Auto Softener Multiport Valves offer precision and reliability in water softening systems. With features like manual operation during power outages, LED screens, and customizable settings, these valves ensure a seamless flow of softened water for residential and commercial use.

MANUAL SOFTENER MULTIPORT VALVE

Reliable Softening, Simplified: Manual Multiport Valves

Our Manual Softener Multiport Valves provide durable, corrosion-resistant water softening control. Featuring easy-to-use manual operations and automatic nozzle cleaning, these valves ensure efficient water softening with minimal maintenance, perfect for industrial and household use.

MANUAL FILTER MULTIPORT VALVE

Precision Filtration: Manual Filter Multiport Valves for Safe Water

UMEK’s Manual Filter Multiport Valves offer accurate and reliable water filtration control. Built with high-quality, corrosion-resistant materials, these valves are designed for ease of use and long-lasting performance, ensuring efficient water filtration in a range of applications.

AUTO FILTER MULTIPORT VALVE

Smart Filtration: Auto Filter Multiport Valves for Maximum Efficiency

Our Auto Filter Multiport Valves are designed for automated water filtration with features like LED dynamic displays and prompt power reset functions. Offering precise control over water flow and filtration cycles, these valves ensure efficiency and durability in high-demand environments.

MICRON FILTER CARTRIDGE & UV BULB

Pure Filtration, Powerful Sterilization: Micron Filters and UV Bulbs

UMEK’s Micron Filter Cartridges capture fine impurities, while our UV Bulbs provide fast and effective water sterilization. Together, they offer a complete solution for achieving pure, contaminant-free water for both residential and industrial use.

DELIVERING CLEAN, SUSTAINABLE WATER SOLUTIONS TO SRI LANKA'S LEADING ESTABLISHMENTS

UMEK's advanced water treatment solutions are trusted by key players in industries ranging from hospitality to manufacturing. By offering innovative, eco-friendly systems like reverse osmosis (RO) and UV sterilizers, UMEK ensures safe and clean water for a variety of applications. Below are some of the prominent hotels, factories, and commercial spaces that rely on UMEK's cutting-edge technology to maintain their water quality and safety.
